

A Brand Name of LP-System

MILKOSAFE®

Preserve Milk Naturally

ملكوسيف®

A REVOLUTIONARY PRODUCT
TO MINIMIZE MILK LOSSES

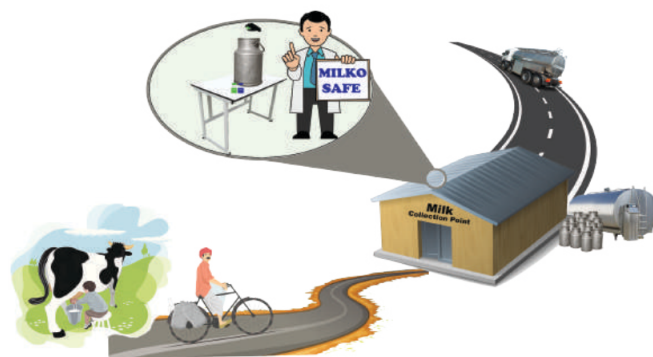

MILKOSAFE®

Preserve Milk Naturally

Salient Features

1. Activates milk's own LP-System extrinsically.
2. Conserves initial quality of milk during transportation.
3. Safe for both milk and milk consumers.
4. Extends shelf life of dairy products.
5. No resistance in micro organism.
6. Recognized and recommended by the Codex Alimentarius Commission of FAO/WHO joint committee and tested by PCSIR Laboratories.

How to use

Step - 1

Fill the churn with milk.

Step - 2

Separate the tube in the pre-packaged container for the correct churn size.

Step - 3

Open the Activator 1 (tube) and add a small amount of milk and mix it well.

Step - 4

Pour Activator 1 into the milk. It is very important that Activator 1 is added first.

Step - 5

Stir for 30 seconds with a clean plunger.

Step - 6

Pour Activator 2 into a milk-filled glass, stir it well, and add it to the churn.

Step - 7

Stir the milk with a clean plunger for about 2 minutes.

Storage temperature of the kit is 10 to 45 °C.

Note:
Use Milkosafe Activators within 1 hour after milking.

MILKOSAFE®

A Revolutionary Product to Minimize Milk Losses

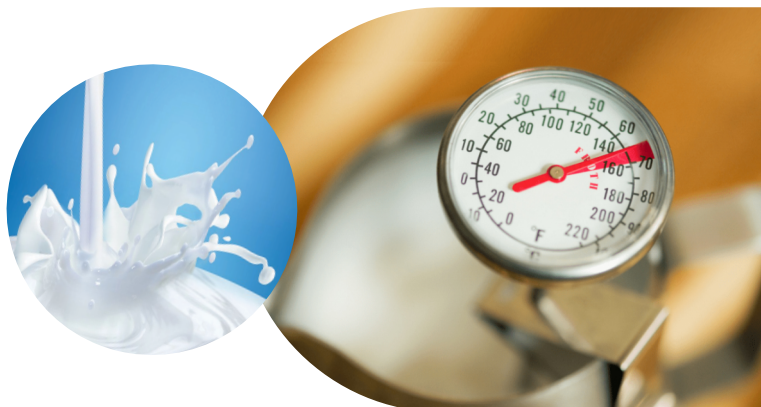

Precautions

- Keep away from children.
- Avoid direct contact with skin.
- Use the right amount of milk as mentioned on the box.
- Don't taste or smell directly.

Extension in milk keeping quality by the MILKOSAFE® at different temperatures:

Temperature (°C)	Time (Hours)
45	6
35	8
25	14
15	28
5	6 Days

(Storage time can be lengthened substantially if the raw milk is of good hygienic quality.)
